EDUCATION

University of Arkansas, Fayetteville

Bachelor of Science in Computer Science | Cybersecurity Concentration

August 2021 - May 2025

GPA: 3.50 | Dean's List

SKILLS

- **Security Monitoring:** Splunk (SIEM), CrowdStrike (EDR), IDS (Snort, Suricata, Zeek)
- **Incident Response:** Alert triage, Log Analysis, Escalation, NIST Incident Response
- **Systems:** Linux (Ubuntu, Kali), Windows, VMware
- **Ticketing & Documentation:** ServiceNow, Change Requests, Confluence
- **Scripting:** Python, PowerShell
- **Security Operations:** Patch management, Vulnerability tracking, Access controls

WORK EXPERIENCE

Application Support Intern | Arvest Bank

May 2025 - Present

- Monitored system and security logs using Splunk, investigating abnormal activity and escalating issues as needed.
- Assisted with incident documentation and tracking through ServiceNow, following established procedures.
- Supported patch management activities, validating updates, preparing release notes, and documenting weekend deployments.
- Reviewed firewall rules for security and access requirements and submitted change requests for approval following documented procedures.
- Created and submitted change requests for production updates and security-related changes.
- Generated and managed SSL certificates using Keyfactor to support secure system operations.
- Developed Linux automation scripts to support monitoring, cleanup, and system reliability.

Data Security Intern | Tyson Foods

May 2024 - August 2024

- Assisted SOC analysts with incident response activities, analyzing alerts, and supporting investigations.
- Reviewed CrowdStrike EDR alerts and endpoint configurations, documenting findings and remediation steps.
- Supported vulnerability management efforts by reviewing scan results and tracking remediation activities.
- Audited data security configurations using Cyera to support compliance and security assessments.
- Built Python scripts to automate security data processing and reporting.

Software Development Intern | Arvest Bank

May 2023 - December 2023

- Supported secure application development by implementing authentication, authorization, and secure configurations.
- Assisted with testing and validation of security-related findings and application issues.
- Documented findings and supported issue tracking workflows.

PROJECTS

Cyber Attack Simulation Home Lab

September 2025 - Present

- Built and maintained an isolated virtualized test environment using VMware to simulate control-system-style, multi-system networked environments.
- Configured Linux systems, network services, and firewall rules to support cybersecurity testing and evaluations.
- Conducted system and network analysis using IDS tools (Suricata, Snort) to validate monitoring visibility and tune detection logic across test scenarios.
- Designed and troubleshooted repeatable test scenarios, documenting configurations and observed behavior to support consistent, standards-aligned evaluation.

Cyber Pattern Labs

August 2024 - May 2025

- Led development of a cybersecurity training platform, supporting hands-on testing of network security concepts.
- Integrated security tooling to demonstrate vulnerability identification, system hardening, and monitoring techniques.
- Collaborated using structured workflows for testing, documentation, and iterative improvement.

CERTIFICATION

- CompTIA Security+ 701 (In Progress; Expected 2026)
